

FAQ

Reign Sanitary Napkins Product

How much liquid can the Reign™ sanitary napkins absorb?

Reign™ sanitary napkins are designed to absorb 50 ml instead of the typical 5 ml or 10 ml from conventional manufacturers. But they have been consistently tested with over 50 ml with 100% success rate.

Are the Reign™ sanitary napkins free from toxins?

Yes. We use a combination of clean ingredients without using any synthetic coloring. As per our internal lab tests, we have a product free from toxins.

Why is Reign™ better than the others?

We simply have a better absorption technology, Reign is designed with a Nobel prize winning material “Graphene” infused strip. The graphene infused strip may provide various health benefits that may improve microcirculation, may promote cell activity and may also help support a healthy metabolism. In addition, may help inhibit harmful bacteria growth, allowing a woman to feel comfortable and most of all dry. Reign pads can actually breathe from the bottom layer. Just the fact that our device can hold up to 10 times more fluid than other brands makes ours a superior product in comparison. Our strip has additional properties and higher quality materials that bring more efficacy to the multiple applications of our strips when compared to others. The overwhelming testimonies from our ladies confirm the efficiency of our product.

What is Graphene?

Graphene is a carbon based material. Graphene is ultra thin, one of the strongest materials ever measured by scientists and has anti- bacterial components. Carbon does exist in the human body. Carbon forms about 18% of the human body. Carbon is an important constituent of living beings. Carbon is one of the essential building blocks of organic life.

Does Reign pads have wings?

Reign Pads do have wings on our Thong Liners, Very Light Panty Liners, Moderate Flow, Heavy Flow, and Super Heavy Flow- Overnight pads.

Is the strip inside of Reign fully made out of vegetable fibers?

Yes, our strips contain no plastic derivatives. The coloring is from vegetable derived coloring fibers as well.

Are the Reign™ sanitary napkins biodegradable?

Yes, the inner membrane of pad where the polymer resides is biodegradable. The polymer is great to give back to the earth which adds moisture to your garden of fruits, vegetables, outside and inside plants.

Are the Reign™ sanitary napkins organic?

Reign pads are 100% all Natural. We didn't see it necessary to include "organic" in our first product line-up because of the way they are designed. They have more beneficial properties for

women's health than any "organic" counterpart on the market (this can be proven by a simple absorption test). We wanted to be able to maintain the price to have a real solution compared to other products on the market. Fair price, superior product.

Are the Reign™ sanitary napkins 100% Cotton?

Reign pads are composed of a material referred to as "soft cotton" in the sanitary napkin industry. The fabric allows fluid to penetrate and become trapped by the core. Due to its high molecular weight and negligible residuals, no systemic toxicity concerns exist for the top sheet.

What type of adhesive is used on the bottom layer of Reign?

Reign is designed to keep a woman completely safe during her menstrual flow. We use a food grade adhesive. In contrast, most conventional sanitary napkins use a construction grade adhesive that is derived from chemicals which can be detrimental to a woman's most precious area. The normal body temperature is 98.7 degrees. During a woman's cycle her body is even warmer and if mixed with harmful chemicals, this can cause disastrous results.

Is the packaging recyclable? Yes, the aluminum packaging is recyclable. Aluminum is also recyclable and one of the highest -value materials you can recycle, and can be reprocessed into new aluminum in just 60 days. We choose to keep the pads away from moisture for this reason we chose to use an aluminum packaging to protect the product from outside elements and most importantly moisture.

Reign Natural Vitamin Sprays Product

Are the Reign Natural Sprays made of natural ingredients?

Yes, our products do not contain any binders or fillers. Reign Natural Sprays are made of Kosher ingredients, NON- GMO and made from plant based ingredients.

How does Reign Natural Vitamin Spray (Mist) work?

The Science behind MISTING:

- Each spray delivers micro droplets into the soft tissue of your mouth
- These droplets are then rapidly absorbed via the capillary rich vein system below.
- This allows for optimal bioavailability – and lets you get on with your day.

Can anyone mist ?

Misting is designed for all ages (depending on formula) and genders – for those who want an easy and fast way to consume their preferred mix of essential daily nutrients.

How can I use the spray?

Before you use our product, pump 6 or 8 times to activate the Reign spray pump. Then spray directly into your mouth, holding for 5 seconds before swallowing. Use 8 sprays per day; you can do this by also taking 4 sprays x2 times a day.

How much does each product tube hold ?

Each tube of Reign Natural Vitamin Spray holds 0.47 fl. oz (14 ml), which is a 30-day (1 month) supply when used as directed, which is 8 sprays per day.

Can I take more than one spray at a time ? If so, how many sprays?

Every person is different with a different lifestyle and different supplemental nutritional requirements – so much depends upon your diet.

We do recommend that everyone use the Multi Vitamin as the cornerstone of their supplementation.

We then recommend that you introduce additional products based on your specific needs.

We market many different products; and each one contains beneficial ingredients. We unfortunately cannot make individual recommendations because we are not familiar with the requirements of each individual.

What is the DV (Daily Value)?

The Daily Value or DV, is the estimated amount of a nutrient per day considered necessary for the maintenance of good health by the Food and Nutrition Board of the National Research Council/ National Academy of Sciences.

How long does it take to see results?

Because your mouth is full of capillary rich tissue – your body will start to absorb the nutrients almost right away. You should start to see results in a few minutes after using the spray. Our sprays allow nutrients to be absorbed quickly without causing additional stress or work for your organs.

Where is the sprays manufactured?

Reign Natural Vitamin Sprays are manufactured in the USA

Is the tube made of aluminum?

The tubes/canister are aluminum. The tube is a food grade and have the added benefit of a food liner for extra protection. The aluminum canister is also recyclable and one of the highest -value materials you can recycle, and can be reprocessed into new aluminum in just 60 days.

Are the products regulated by FDA?

Our products are dietary supplements, and therefore, we conform to all current good manufacturing practices as defined by the FDA.

Can I return the product?

We are proud of the quality of our products. If there is an issue with your spray performance, not spraying. Please return the unused portion within 30 days of purchase to be exchanged for a new spray. Please note that you are responsible for the cost to ship the spray back to our facility. Once your spray has been returned to our facility the spray will be tested before issuing a new spray. If the test results indicates the spray is functioning correctly, we will return your initial spray back to you. If the test results indicate that the spray is not operating correctly we will reimburse the standard USPS shipping cost to you.

Please store your spray in a cool, dry area. Please do not store in a vehicle or in a heated environment which will result in damage to the canister.
